Escape to mars
It ain't that far...
Escape to mars
It ain't that far...

Verbal-verbal-verbal-verbal-verbal-verbal-verbal-verbal
Verbally strike like
Lightning
Phenomenal
Abominable rhymer rally
Timin' always automatic
Python clouds surrounded to
Gather all the planet
Night comes down
And all about there's a lot of panic
Gratification
Quick fix
Mind manic
In the wagon
Antagonizing the wind
All matter
It is the earth who'll stand through
The aftermath
That'll bring forth many avalanche storms
In the canyons
Once filled with snow
Whether only the tarantulas and insects survive
Replacin all humanity
We crammin all the damage in the ozone habitat
And travellin into a savage end
I hope the tabernacle songs
Bring upon the awakening of the nap
And gunna be a long long summer [?] after that
Man wonton soup
Plant life cabbage
That is guided by the powers
Of the dyin and the flowers c'mon

Escape to mars
It ain't that far...
Escape to mars

It ain't that far...

A 4 {degree} C rise in temperature would put many of you at risk of coastal flooding, causing 30-50% reduction in water availability, in southern Africa and the Mediterranean. Agricultural yields will decline. 20-50% of animal and plant species would face extinction.

2 0 1 2

Party over!

Oops

Out of sight

Time, mind

Illuminati death trap

Blind deaf and dumb

Crazy bent

80 percent

Wiped out sniped out

Burn baby burn get hit

When we could've been turnin the cell phones off

Ripped through your city the Bentleys that sell most [?]

Fish, than the fishes you catch

They smell so toxic from the rivers ingestin their flow

now

(Wait?) til humidity's

Summer's are left cold ya'll

Kids gunna feel it

There's no effect on ya'll

Since you directly don't experience no

Cause and effect

Drift inflicting the ozone wall

Gradually

It's all at a hands happening

Global warming on the rise

Sad to see

If we don't make a change now

Then the path that we choose

Is our own til we save our planet

Renovate all traffic

Innovate more atmospheric

Brace all damage

Done away with

Maybe some escape to another planet

Face mutated

In a spaceship

Travelling in spaces

Examining the ways of man

And how we take advantage of

The place we inhabit it

And taste more lavish shit

Racism hatred we did got past it

But we may all be prey to the wrath of Mother Nature

Escape to Mars... [x4]

It ain't that far
Escape to Mars
