"Human Hatred"

Visit "[Human Hatred](#)" on MotoLyrics.com

It's spreading like disease
They hate without a reason
It's spreading like disease
They hate without even knowing why

Blinded by a lie
Made up by themselves
To protect them from what
They know nothing about
Insecurity in their own existence

The words of ignorance
Creat hostility
It's filling the air around us
So that we can't breathe

It's spreading like disease
They hate without a reason
It's spreading like disease
They hate without even knowing why

Blinded by a lie
Made up by themselves
To protect them from what
They know nothing about
Insecurity in their own existence

This human hatred disease

Afraid to open their minds
They choose to live in their lie
