Radar's on, cruising low altitude
Just a few more miles, til I elude
Enemy planes coming from foreign skies
With orders to demoralize

Holding hands in the underground Everything's here right here Everything's here right now All that is Is what is now

Who am I without your photograph
The wind blows through, this loveless craft
Dodging the ghosts, haunting these vacant skies
I've been out here so far
I've been out here so long, demoralized

Holding hands in, the underground The walls above us Are coming down

Everything's here right here Everything's here right now All that is, is what is now Here right here Everythings here right now All that is, is what is now

We could take over We could take over We could take over We could take over

Here right here Everything's here right now All that is is what is now... Everything
