Chorus:

I'm over you, I'm over you
I'm over you, we're through
I'm over you, I'm over you
I'm over you, it's true

You said that we would last forever
And now we're not even together
You thought that you were really, really clever
And now you're in for stormy weather
You thought that you would break my heart
You thought that I would fall apart
You showed me just what kind of boy you were
How could we have come this far

Chorus

You run around telling your friends
We will be together again
But baby I got news for you
Why can't you understand we're through
Maybe it wasn't meant to be
How could you be so mean to me
Now I'm gonna take my step
I'm gonna find another man

Chorus (2x)

You run around telling your friends
We will be together again
But baby I got news for you
Why can't you understand we're through

Chorus (4x)
