Take it in and don't regret  
Here in lies the moment  
But please don't ever come back with that smile  
I was along for the ride.

Could you let this sink into your head,  
For just one more second inside my bed.  
The pillow screams what I cannot  
Just thank God that we've never been caught.

Cause I can  
Do things you can only dream of  
Everything your boyfriend couldn't do  
Take a look at what you're missing  
(Take two down and one to go)  
Break it up

I'm tryin' hard to shake this  
But you have got me spinning in circles  
It's all we need to do  
(Take two down and one to go)  
Break it up

If you wait one day,  
It will be okay I've let it all go to my head for the last  
damn time,  
It seems they always say,  
Feelings never fade like photographs.  
Could this be a part of your plan?

Cause I can  
Do things you can only dream of  
Everything your boyfriend couldn't do  
Take a look at what you're missing  
(Take two down and one to go)  
Break it up

I'm tryin' hard to shake this  
But you have got me spinning in circles  
It's all we need to do  
(Take two down and one to go)  
Break it up

Come on Come on,  
Listen close right now.  
Put up your hands and make that sound.  
Do it for the lovers and losers and lets not forget our  
favorite users.  
Pull yourself together,  
There will always be stormy weather  
So don't deny what we had,  
It never felt so bad.

Cause I can  
Do things you can only dream of  
Everything your boyfriend couldn't do  
Take a look at what you're missing  
(Take two down and one to go)  
Break it up

I'm tryin' hard to shake this  
But you have got me spinning in circles  
It's all we need to do  
(Take two down and one to go)  
Break it up
