White stars enclosed in glasses
Like to disappear...
As carved in the pulse of my artery that won't stop
Beating in four times i guess
That's because reason is clocked in
At unbelievable speed
Mesh liquid forms
That connect intact shells
Mechanoid diversification
I'm in the first bin i told you
This is the first selection
And timeless reclusion in ice triggers
Stability
So that abilities are
Proven indefinite

I still need electricity to feel eligible in here
(i know) need elec(tricity) to feel eligible
