

Severed Head Of State "Thrown Into The Seas Of Fire"

Destroyer of worlds... swallower of lives...
Leveler of dreams... silencer of cries...
Seas of fire... rivers of blood...
Landscapes of ash, excrement, and mud...

There is thunder in the east and hell in the skies...
Everything that is born eventually must die...
Pestilence and plague... heaven aflame...
Molten cities flattened by a force that knows no name...

And apocalyptic vision that we are too blind to see...
A planet ruled by madmen... a reality to be...
Now in total darkness this world stops turning...
Smoldering planet... ash forever burning...
