As it burned
The fire within me brought forth my hidden face
I walked through the fire eternal
9 voices within me
Were tearing me apart
To open the gateway they had to speak
With the same tongue
So I slain my wings and changed into serpent skin
I hid my face from the sun
Serpent-Angel watched over my every step
As it burned
The power within me brought forth my hidden face
I walked through the fire eternal
I had the key beneath my skin
To open the gateway of sin
The vortex called to it's embrace
Blood coloured the white
I walked through the scorched fields
Towards the gates
There was only oneself and the Black Flame
I was in every flame
I was in every shade
Our legion shunned no sacrifice
Harvesters of death walking among men
The skies opened and the final chapter wrote itself
Predators of apocalypse were on a hunt
The chosen 9 entered into the eye
What is end to others is total victory for some
Predators of apocalypse were on a hunt
The chosen 9 entered into the eye
What is end to others is total victory for some
