Dread

Dread

My dread was from you

To ask from you about love

I hope to not come that day

I hope to not come that day which is late to ask from
you about love

I hope to not come that day

Dread

I afraid from the day which I forget you

I afraid from becoming despondent

I afraid from the day which I leave you and not to be
with you

And not to be with you

My dread treading on my wing

My dread was from that I leave you because of your
pessimisms

My dread was from your virulent and namby laughs
If you knew my heart is lost at your night

Dread

My dread is that you find out my life very late

My dread is that I won't wish to leave together

Dread

I afraid from the day which I forget you

I afraid from becoming despondent

I afraid from the day which I leave you and not to be
with you

And not to be with you

My dread treading on my wing

My dread was from that I leave you because of your
pessimisms

My dread was from your virulent and namby laughs
If you knew my heart is lost at your night
