

## Shadowlord "Brothers Of The Storm"

Visit "[Brothers Of The Storm](#)" on MotoLyrics.com

From far away lands they came  
To further lands they went  
Forbidden terrain they tamed  
Forbidden rules they bent

They came to prove their worth  
They came to conquer the earth  
For power and steel they fight  
With metal they ride into the night

Brothers of the storm - they will never fall  
Brothers of the storm - they'll never give in  
Brothers of the storm - feel the steel in your heart  
As brothers they fight and as brothers they shall die  
With hearts of steel, it's thunder they bring  
With hearts of steel, it's metal they sing  
Against the world, they shall never change  
Against the world, victory is theirs
