Well I was down but you called me up
i love the sound when you're talking that stuff
You say you're lost and a little confused
You don't know what this is coming to

You say it's hard making sense of your life
I know it's hard, but you gotta keep trying
Don't keep it locked in your mouth like nothing ever
happened
Let it come out, there's something really happening

Ch-ch-chatterbox, how you talk, talk, talk
S-s-say those words were the best I ever heard
Ch-ch-chatterbox, baby please don't stop
You're my chatterbox

Well I see red so I talk to myself
The line goes dead and I talk to myself
I like that perfume and the shape of your hips
When you melt into my fingertips

I know it's hard making sense of your life
I know it's hard, but you gotta keep trying
Don't keep it locked in your mouth like nothing ever
happened
Let it come out, there's something really happening

Ch-ch-chatterbox, how you talk, talk, talk
S-s-say those words were the best i ever heard
Ch-ch-chatterbox, baby please don't stop
You're my chatterbox.
