[Vers]

I am standing in the rain now
Waiting for a sign
Can't believe why you did this
And now time is passing by

[Brygga]

All those years, is gone
All the things, we've done

[Ref]

Can you see all the pictures I'm having of you
And all the things we've been through
And how, can we escape this fate for one last time
What if this was a lie

[Stick]

What if I could change this
What if I could make this stop
What if I could turn back time
What if I could stop this... War

[Stick]

Like a shadow you will come again

Like an angel you will fly away

[Ref]

Can you see all the pictures I'm having of you
And all the things we've been through
And how, can we escape this fate for one last time
What if this was a lie
