You are the light after the long day
You put me right, you lead me my way
You are the light leading me my way home

So many times I've come back shattered
Out of my mind, beat down and battered
So many time, but you help me leave it behind

And all this time has come and passed
I can't see the sights when I move so fast
But, you are the light that leads me on
You are the light that I call home

It's taken a long time to see just we're made of
There's so much we've come through
How can I thank you for your eternal patience
I'm racing back to you

All this time has come and passed
I can't see the sights when I move so fast
But, you are the light that leads me on
You are the light that I call home

All this time has come and passed
I can't read the signs when I move so fast
But, you are the light that leads me on
You are the light that I call home
