I don' t feel good I don' t feel that bad
I don' t feel great but I will survive
I could do with but I did without
I could look good but I don't even try
I could do straight what a twisted path
I could do in when it's better out
I could give tons, but I keep inside
I could do larger 'bout you deep inside
Will you reach for me instead?
Will you reach for me instead?
Oh I love you more and more...that's a lie
I don't do good I don't do that bad
I don't do great but I will survive
I could do with but I did without
I could look good but I don't even try
Will you reach for me instead?
Will you reach for me instead?
Oh I love you more and more, that's a lie...

You wanted us to try, you wanted us to try
Let's go and see the light, to go and see the light
Different King Fu!

I can do good I can do that bad
I can do suede but I keep inside
I can do fiets I don't even try
I can do great about you deep inside
I can do fence I can do a vow
I can do great and I will survive
I can do suede but I feel it slide
I can be rich about you deep inside
Open you wide open you more now
Padadadam nananamnanam...
