Take me in your arms and tell me its alright to dream
of anything I want and anywhere I want to be
Tell me theres so much, out there you want to show me
and even in my nightmares you'll be watching over me
And I swear I'll never move..

I could get oh so used to this (baby)
I could get oh so used to this

Wrap your legs around until you almost smother me
and stare into my eyes and tell me its alright to breathe
Come down from above spread your wings and cover
me
cuz' even in the shadows we see all that lovers see

I could get oh so used to this (baby)
I could get oh so used to this

Out in the streets and behind the closed doors
you've got my back and baby I got yours
Nothing can touch you nothing can harm me
I am your angel, you be my army now

(Yeah) I could get oh so used to this (baby)
I could get oh so used to this

When you wrap your arms around me
I'm oh so glad you found me
I want to spend my life getting used to this

Wrap your arms around tell me its alright to dream
