Stardust fills the endless night  
Through galaxies of darkened skies  
Where memories begin to fade  
And dreams no longer die

This universe my lonely place  
Where few will ever see  
The empty spaces left behind  
Where life it once had been

Hey, we're a part of the Stardust  
Just another light in the sky  
Yeah we're a part of the Stardust  
Spinning long after we die

Stardust fills the endless night  
Through centuries of war and pain  
Where tears from countless eyes have fallen  
And wounds forever bleed...

Hey, we're a part of the Stardust  
Just another light in the sky  
Yeah we're a part of the Stardust  
Spinning long after we die

Stardust fills the endless night  
With signs for all the world to see  
Forget the sun the signs will say  
The light can set you free...

Hey, we're a part of the Stardust  
Just another light in the sky  
Yeah we're a part of the Stardust  
Spinning long after we die
