This is the song against itself  
It's of two minds of it's own  
The discussion brough to logical conclusion  
It follows through  
But is not true  
We'll just write a song against itself  
Why do you act like you don't know  
What in the world i'm talking about?  
It follows through  
You have no clue  
(I've already had it up with you)  
(I've already had it up with you)  
(I've already had it up with you)  
(I've already had it up with you)  
(I've already had it up with you) \*Lucas Krupinski
