Get away from me
Get off my back
You've gotten too close
You've made me go mad
I feel so confused
I feel so lost
There's nothing to live for
There's everything to loose

(Chorus:)

Now I can't do anything without you
And I can't feel anything without you
I can't talk to anyone without you
You're always here. You never go away
Skin Deep

Too much pressure
Too many things to do
You won't just let me settle
You won't just let me dream
I'll never be good enough
I'll never be who you want me to be
Words burning my heart
Words coming from you

(Chorus)

I hope you understand these words for you
Understand I can't be who you want
I hope you don't go and get angry again
Don't think that I love you anymore

(Chorus)
