

Shot Down Sun "Lethargy"

Visit "[Lethargy](#)" on MotoLyrics.com

Every night I escape your eyes
To no avail or surprise
Every time you are mistaken
Shut your eyes and sleep forever

I can't say that I see us living on
For every breath is wasted upon you
Time stops, I feel weightless
A nightmare I see face to face

All hail the darkness
Only sleep can bring

All through the night I'm inspired
Of ways to kill off the bitter ends
Once again, we lay to rest
All of the things we detest

Sleep to dream
End the world
