Slip down, so deep
Lost in dead sleep

Breathe
In deeply

They can't take you away
If there's nothing left to take
These tragedies fall to their knees
Blind my eyes with somnolence

Just let me know, when I awake:
Will you be right there by my side?
It's just a dream
It's just a dream

Wake from this dream

Wake from this dream

Lies fill my mind
Trapped deep inside

When you were here the other day
You turned to me, then turned away
I couldn't eat, I couldn't sleep
Now I'm stuck here

Breathe
In deeper

They can't take me away
If there's nothing left to take
These tragedies fall to their knees
Blind my eyes with somnolence

Just let me know, when I awake:
Will you be right there by my side?
It's just a dream
It's just a dream

Wake from this dream

Wake from this dream

Wake from this dream

It's just a dream
It's just a dream

Just let me be
Just let me be

They can't take us away
If there's nothing there to take
These tragedies fall to their knees
Blind my eyes with somnolence

Just let me know, when I awake:
Will you be right there by my side?
It's just a dream
It's just a dream

Wake from this dream
(Wake from this dream)
Wake from this dream
(Wake from this dream)
Wake from this dream
(Wake from this dream)

It's just a dream
It's just a dream

(Wake from this dream)
(Wake from this dream)

Just let me be
Just let me be
