You know  
I'm kinda feeling that  
It's running circles and  
So take a look back  
It's all you need  
Well it's just you  
Just you and me

Taking deep breaths  
We gotta take it slow  
I never know  
Know which way to go  
I'm shouting out  
I'm screaming things

Oh oh ay oh  
Oh oh ah oh  
Yeah-h

Step up  
Well throw it away  
I'm feeling down on the fact that youve got nothing to  
say  
And what's the point in this if all we do is argue  
Lets just play this tune  
It's written cause I love you

Step up  
Well throw it away  
I'm feeling down on the fact that youve got nothing to  
say  
And what's the point in this if all we do is argue  
Lets just play this tune  
It's written cause I love you

It's not the way that we talk for hours  
It's the way that we don't have to try  
It's not the way  
It's the way I laugh at all the faces you make

It's not the way that he used to hurt you  
It's the way that you know I never will

It's the way I know I can trust you  
Even when you're with some cute boy who likes you

Step up  
Well throw it away  
I'm feeling down on the fact that youve got nothing to  
say  
And what's the point in this if all we do is argue  
Lets just play this tune  
It's written cause I love you

Step up  
Well throw it away  
I'm feeling down on the fact that youve got nothing to  
say  
And what's the point in this if all we do is argue  
Lets just play this tune  
It's written cause I love you

Avenue  
And I thought to myself  
Will this be the end  
I'm never quite sure  
I guess I'll just wait and see

I guess this is it  
Last chance

Step up  
Well throw it away  
I'm feeling down on the fact that youve got nothing to  
say  
And what's the point in this if all we do is argue  
Lets just play this tune  
It's written cause I love you
