We can never understand  
What's truth or lies about the world these days  
In the western civilisation  
We watch the new God called dollar, pound and mark  
But when you sit in your 1000 square meter house  
The pain and loneliness marks your face  
You see money isn't everything  
That makes the world go round, you live in the dark

The goal you set will forever tell you lies  
You're struggling in vain for your own greed  
Sit back and watch your life is rushing by  
The success you want to reach is out of sight  
You're going to die without the feeling that you've been  
alive  
The life you lost, the love you wouldn't ever feel

There's no control, there's no sense of living  
There's no time to die  
God bless America  
The land of opportunities, the melting pot  
Glory, glory Hollywood  
We're watching the young men dying in the gulf  
The both sides of the coin they show  
Makes no success for me, for you  
For us, for them, for no one

We're not supposed to die  
In the bonfire of vanities  
We're not waiting here for nuclear waste  
We're not crying until the end
