I order drinks to tall and take strong sips
Yeah, I smell of smoke but I make up for it with my lips
Could you be my tautou?
I see that little french girl in you
I'd set my heart on fire, oh yeah,
Set my heart on...

[Pre-Chorus]

Now that we got this far, it all comes down
I had to lose you to find myself

[Chorus]

Now that we got this information would you wait for
me?
Would you wait for me?
Or should I not even care anymore?
Now that we got this invitation would you wait for me?
Or should I not even care anymore?

A philistine with a degree,
There's no one better than you but me,
I'm like that kid without a line who gets the girl every
time
Could you be my Antoinette?
French girl to love and then behead,
I'd set my heart on fire, oh yeah,
Set my heart on...

I can do it, let's get to it
Come on baby, yeah, we can do it.
Well god damn, god damn.
Well god damn, will you wait for me?
