Your life was a season
But so hard to face
Your life was so easy
Till you took that taste

All you needed was that place
All you needed was that taste

All you needed was that lace
All you needed was that taste

Your sarkoms? Down from glass now
Exploring all the spares

WeÂ´re all gonna miss you
When you leave this place

All you needed was that lace
All you needed was that taste
All you needed was that lace
All you needed was that taste

Just a taste
Just a taste
Just a taste
Just a taste

Your life was so easy

Just a taste
Just a taste
(Your life was so easy)
Just a taste
Just a taste
