"For Many Years"

Visit "[For Many Years](#)" on MotoLyrics.com

A noise in my brain
A day in the grave
A cut in my life
Around this darkness of the pain

Iâ€™m trying to time
The beats of my heart
You canâ€™t stop it
Around this fortress in the fog

Let me see what you want to be
Let me know what you want from me again
Set me down and Iâ€™ll forgive you now
For many years...

There is no air
There is no breath
To leave out the words
And every stupid things you need

My eyes were streaming
From the hard wind blowing down
It was so cold
When it reached the town

Let me see what you want to be
Let me know what you want from me again
Set me down and Iâ€™ll forgive you now
For many years...

Iâ€™ll follow you there
But I would really like to know where
The music changes, it is really strange
Itâ€™s like a bomb over them
Everybody runs everybody wants to look for
A place to save themselves
The pride has died, the love is crying
To me you want to say goodbye
