Welcome to our hideout
Electrified twist and shout
This is the sin that will do us in
Welcome to decadence
Victims of self defense
This is the sin that will do us in
Welcome to a conclusion
Tied up in sweet delusion
This is the sin that will do us in
Collect the corpses
Count down till you see one you like yeah
Show your scares let your slits
Smile till we see one recognize
Recognize your movements body movements
This young movement
Push the record so we can watch the end again (x3)
Sirens singing on and on and on (x4)
Here it is here we are business as usual
Can you feel it get down
With this incognito waves electrify the movement
God hates rock
And roll and rock and roll hates god right back
This sin is in (x4)
This young movement running like it has to
This young movement moving like it wants to
This young movement evolves like it needs to
This young movement feeling like it should.
(welcome to our hideout electrified twist and shout
This is the sin that will do us in
Welcome to decadence victims of self defense
This is the sin that will do us in)
