Celestial Extinction

The blood is not dry on our ancient sins,
as i speak to you in the present mine eyes see a
terrible future do you not see what i see?
do you not see your own death approaching?
From sinners regrets
I gather true strength
and all will be right
if you die, alone
The mournful cry of children shall shatter the peace

and shake the foundations of heaven, as nightmares
realized are true
no knowledge will save you , no magics will buy you
time
for you will end up in fire as heaven and earth will burn.
Watch the stars fall from the sky
celestial extinction
Watch them fall from the sky
watch them fall from the sky
celestial skies are black as night tonight
