I won't break this
It took so long to make this
The life i lead is getting through to me
I won't take this
It took so long to get rid of this
Anything is everything to me

What a step in time

Running after you
I don't know where you are
And i can't seem to catch you
I want you to know me

The pain that greets me
Is the stick that beats me

Solid dream
Hope isn't what it seems
Words i can't miss is the song that sings you
Missing friend tomorrow is the end

What a step in time
Find my place in life
