Let me tell you about my best friend, let me tell you all /  
x4

My music, set me free, fill me

My music, move my brain, for feeling me

We met each other long time ago,

When I was about a three years old,

That time we ...

That no one of us is gonna leave the other

She come in to listen to my heart,

So I could find my source my pride, yeah,

She never betrayed me or lie to me,

She's the one I could believe.

My music, set me free, fill me

My music, move my brain, for feeling me (x4)

(RAP)

Boy, now it came to me

Shame on me, I was blind but now I see,

This music is so much bigger than me,

Growing steel(?), through the centuries,

Didn't know how to do my thing,

I didn't know to handle this game,

Now's my turn, I'm doing this shit,

Gimme your hand and follow me.

And this is how the story goes,

I been around the world, been around the coast,

If I'm wrong, if I'm sick, stop me now,

But tell me how could I stop making chicks go 'woow'

I'm about brake of something proper,

As you see nobody can stop us,

Taking the time, I'm doing this shit,

Gimme me your hand and follow me.

My music(la la la)

To the end...
