v1

At night I close my eyes  
I see a light that's shining down on me  
Is it you from afar

I can't sleep  
I can't breathe  
life's so much harder now you're gone  
Is there no turning back

Pre

Cos everytime I need someone  
I call your name  
No one can love me like you do  
But I'm still all alone

Hook

I cry out  
I cry out  
For you  
But you're so far away  
I cry out  
I cry out  
For you  
But you're already gone

v2

One day you'll see  
She'll never love you like I do  
Was my love not enough  
We play these games  
But at the end  
Nobody wins  
Cos we're still torn apart

Pre

Cos everytime I need someone  
I call your name  
No one can love me like you do  
But I'm still all alone

Hook  
I cry out  
I cry out  
For you  
But you're so far away  
I cry out  
I cry out  
For you  
But you're already gone

Bridge  
Every night before I lay (before I lay down)  
I pray to God you feel my pain  
But if you never return to me  
I hope you'll be okay  
For your love

Hook  
I cry out (all alone on a loney night)  
I cry out (I lay here waiting for you)  
For you  
But you're so far away  
I cry out (Hoping that one day you'll see)  
I cry out (my love was always for you)  
For you  
But you're already gone
