When I look into the painted sky  
I see so many colors  
They're all a part of your design  
It's such a brilliant display

Chorus:

I love the way the stars shine for you  
And every single mountain bows down  
I love the way the universe is singing your song  
So I'll try to sing along

Looking up into the dark blue night  
I'm in awe of your power  
The way the moon pulls the ocean's tide  
You are never contained

Chorus:

I love the way the stars shine for you  
And every single mountain bows down  
I love the way the universe is singing your song

So I'll try to sing along

All the world is singing your song  
I raise my voice and sing along

I love the way the stars shine...for you  
I love the way the stars shine...for you

Chorus:

I love the way the stars shine for you  
And every single mountain bows down  
I love the way the universe is singing your song

Chorus:

I love the way the stars shine for you  
And every single mountain bows down  
I love the way the universe is singing your song  
So I'll try to sing along
