"Fist Of Fury"

Disgusted degraded how low could he stoop
Sat in the corner with a glue sniffing group
His mind became hazy he got higher and higher
He told of his hardships but they called him a liar
He threw his fist a fist of fury
But try to explain it to judge and jury
Who would believe a youth without pride

Fist of fury he threw in despair
Fist of fury cos nobody cared
Delinquent dropout, too evil to mention
All because the public could spare no attention

He ran from the gun of society
But the blasts were heard by you and me
So he turned to drugs to help put him back
On the ground before society's attack
