"Incomplete"

Visit "[Incomplete](#)" on MotoLyrics.com

It's past midnight
I can't sleep.
For thinking of you
Too much space
In this room
This king size was made for two

I'm looking now
Wishing on a star that you'd come back
In
Into my heart staring out (again)
Praying to the skies that you return
In
Into my life once again

[Chorus]
Without you baby I feel incomplete
Come into my life once again
Let it go back to what it used to be
Come into my life once again

Come into my life
Come into my life
Girl, come into my life
Again

Inside I'm stuck
No showers
Don't wanna wash away your last touch
To the side
Every night
For you until the sun comes up

Steadily looking out
Wishing on a star that you come back
In
Into my life staring out
Praying to the sky that you return again
Into my life

[Chorus]

Without you baby I feel incomplete
Come into my life once again
Let it go back to what it used to be
Come into my life once again

I see the star (star)
Shoot right past me room (room)
Window and I try (try)
To reach for it to get close to you
And then I am (am)
On my wish list and everything that I miss
I hope it comes true

[Chorus]
Without you baby I feel incomplete
Come into my life once again
Let it go back to what it used to be
Come into my life once again

Come into my life
Come into my life
Come into my life
Again

Oh baby, come into my life
Come into my life
