...straight for you, anything in the world, just say the
name, I'll do it
High as the cloud I reach, always a lone street
There's no limit too much, you can call me
You should know that girl, by now, by now
You should know that girl, I will, I will
You should know that girl, by now, by now
You should know that girl, you should know that girl
I did it wrong, so deep that I can't escape your wall
And I don't wanna leave you not at all, not at all
Out of everything that I had to dream about, you're my
favorite topping
I do everything I can, you too believe in me as I do in
you
Make no mistakes, survive the level of my love
I know how much you care, you should know that I will
be right there
No matter the cost, because I do anything for you girl,
I pull the strings for you
Anything in the world, just say the name I'll do it
High as the cloud I reach, always a lone street
There's no limit too much, you can call me
You should know that girl, by now, by now
You should know that girl, I will, I will
You should know that girl, by now, by now
You should know that girl, you should know that girl.
