

## Skyfox "Carry On"

Visit "[Carry On](#)" on [MotoLyrics.com](https://MotoLyrics.com)

Let's take off and get away from this place.  
Nothing quite like flying high to put a smile on my face.  
Window seats and peanuts cheer me up,  
And a cup of lukewarm coffee with food that really  
sucks.  
But sometimes things go wrong, kind of like a terrorist  
Detonating a bomb security had missed.  
Or maybe it's just me  
And all my insecurities

Chorus:

Depart your broken heart and fly away  
Your baggage weighs too much, it needs to stay.  
The most important things are small so carry on.

Things may get rough from here  
Sometimes this world just weighs too much  
Maybe we'll crash into it  
Before it crashes into us  
Smoke 'em if you got 'em 'cause this sign don't mean a  
thing  
With no wings your dreams are floating... ?... stalling,  
leaking kerosene

But there's still one last hope the shore's not far from  
here  
If we can make it there our problems disappear  
So drop the landing gear  
And illuminate the seatbelt sign

Chorus:

Depart your broken heart and fly away  
Your baggage weighs too much, it needs to stay.  
The most important things are small so carry on.

Carry on.
