

## Skymning "Above"

Visit "[Above](#)" on MotoLyrics.com

Open the book of our lives  
Read our souls travel through our minds  
Give us the wings of a raven  
And show us how to reach your heights

Open our hearts with your key  
And watch how we will reveal our anger  
Give us your hand and take us from this world  
Open your clouds show who you are

Give us a sign!  
Will our truth be a lie?  
Take us to your dimensions!  
Let us soar on your spaces above

Oh thy mighty demons in the sky  
We feel you show us who you are  
Can you hear our cries, can I see thy mighty demons  
now  
Where are you my makers?  
I'll heed your call if you show me who you are

Show us the worst inner fears  
What is breeding in me?  
Lead us on the path of fate  
Remove the bars that chain us to this world

What have we done?  
To be created into this inferno  
Raise us to your level  
To the towers of beyond  
To the castle divine
