Everything gets broken
And pushed aside
Sympathy will be spoken
Even faith will die

I've got a thing about wheels
Everything returning
I've got a thing about wheels
I've got a thing about wheels

Love , Love , Love only love remains

Where we are standing
Is where they put 'em in the earth
All his beautiful faces
There's nothing of him left

I've got to walk through that earth
I've got to walk through that earth
I've got to live through that death
I've got to live through that death

Love , Love , Love only love remains
Love , Love , Love only love remains
