Hello little darling
Ain't no need to worry
Feels right in my arms now
Why go home, be all alone?
But if the sunshines know that's because of you
Just know that's true.
When all your moneys gone
Where will you be?
If your love is strong
That's all you need.
[G-Love]
One time you know i love you
With your funky ass style
I love you twice a month since you had our first child
Our love runs deep like the blood in my veins
I love you always, and always the same
Love remains.
Love your every change
Love your every phase
The passing of the day, plus when your away
Oh darling darling if you stay my love will never change
Feel the power when our 2 hearts will combine
The power is yours and the power is mine
When love is born you know the sky must cry
Write you love letters till my pen runs dry
If you stay, good lovin make me wanna fly
If you go, rise and fall-dip and dive
You who I'm with so i shine so bright
I love you darling till the day that i die.

Darling darling I said now where'd you go?
I said I'll never know, the way you come and go.
When all your moneys gone
Where will you be?
If your love is strong
That's all you need

Call a 911 and it's emergency
But even in the 912 do you feel the urgent see
To people all around the world who never heard of me
Just leave another message please
Lord please guide and protect me

I got the love in my heart
I got fire in my soul
This no type of fire that nobody can control
But when I'm up on the mic
I got the mind overload
They never test me just because they don't rock and
roll
I'm singing oh my God Lord have mercy
Thought fools were gettin bad
But now they're even gettin worse see
Somethings can't be healed up by no doctors or no
nurses
It's time to stop the fussin' and the fightin' and the
cursin'
This world is hopeless,
But i love it anyway
That's why they givin all the good love for free
And if u need love, with your lovin are you brave?
Come on and give a little good love to me
That's what they want.

Darling darling i said now whered you go?
I said I'll never know, the way you come and go.
When all your moneys gone
Where will you be?
If your love is strong,
That's all you need.

It's a long long way from home but hold on.
It's a long it's a long long way but hold on.
It's a long it's a long long way but hold on.
It's a long it's a long long way but hold on.

[fading out]
Call a 911 and it's emergency
Lord please guide and protect me
Call a 911 and it's emergency
Lord please guide and protect me
