Visit "[Lost](#)" on [MotoLyrics.com](https://MotoLyrics.com)

You can't help the way you wander  
You can't help the way you flee  
You can't help your six surrender  
Can't you just accept defeat?  
Try to help in every way but all you do is let me down  
If you help me understand  
I won't let you hit the ground  
Didn't pay attention to the things I had to say to you  
Suffer for the tendencies that other people put you thru  
Now you're left with nothing but the different voices in  
your head  
Everyone's a memory, saying something you once said  
You try to scream  
You try to shout  
Forget about it  
Nothing's com'n out  
Repeat  
You're lost  
Repeat twice
