Her face is like a bad trip - sexpot living fast but I guess
she'll pass on the everyday love fix -
Emotional slap to the face - regrets - too many things
too many things
She likes the taste and smell but she can't afford it -
Brokered ass - beaten up but she won't report it

Scared - I'm the man in the mirror with the smile hiding
in your tears
Retain - situations from the past brought to light after
so many years
Explain - (nothing I'll keep it bottled up, seal the top with
the plug)
Repaired - mend the jagged holes and soothe the mind
with the happiness drug

She thought she found her Disneyland when she saw
the bright lights -
But it turned to hell when the lights went down - blinded
by dark nights -
(Stop) - She wants off the train because she's gonna be
sick -
Push it back push it back - yet another attack - as she's
sucking a strangers dick

She likes to believe she's in control - but she needs a
fix -
Narcotic narcolepsy sedated by needle pricks -
(Heaven) - Is a drug filled mind and a girl that's
beggin' for abuse -
About to fall - my sex drenched doll - and I'm looking to
find a use
