Concealed in a secret text - masked within the cryptic
lines
Invisible time lock - circumstance shock - curious marks
lead curious minds
To a place of consciousness - hidden warnings of end
game -
The cipher in the flesh - drawn by those which have no
name

(You thought you knew the way to get past this - but
guess what - you were wrong)

No exit to this in the - end game - nothing inside
No need to cry about the - end game - the world has
died

Wars in places slashed with names - identifying
enemies -
Connecting dots while skipping spots - name the ones
that came to be
Intensifying sequences - chaos - melee - end of days
Predict - restrict - conflicting stories - left right up down
passing phase

Countdown to my destiny - I dance within the devils
clutch
Fill the space with senseless lines - and shield my eyes
from Sodom's touch
Baptism in a bloodstained bath - Torah Torah on the
wall
Can't comprehend - the game will end - the crucifix is
sure to fall
