Did I stutter? Did I slur? I've seen what happens to a  
dream deferred.

Washed up in dirt, concern: commerce.

The question, who came first and what their worth.

In a system designed at conceptions birth, you don't  
know me, I know you're bellicose.

I'll stay passive until my aggression breaks your nose.

Fuck you, fuck Bush, fuck this.

Fuck making points that I know you'll miss.

Fuck you and your scene for belittling issues that need  
to be addressed.
