I sense your not avowed  
I know there's death around  
I catch the damage in the air

I got the skull and bones  
I lick the polished chrome  
There's magic everywhere  
Can I please just talk with you  
Fear is deep and drained in blue  
I used to smile

Come on and feel our love  
Come on and feel our love  
Come on and feel our love  
Feel Our Love  
Come on and feel our love  
Come on and feel our love  
Come on and feel our love  
Feel Our Love

Feel Our Love

Feel Our Love  
If love ain't too much  
For I love what I sung  
What I've sung  
I split in half  
Now it's always  
However you and I  
Love is always  
Fun

A single cross to bear  
A team he proves are there  
Where we won't we've got a night

The night begins a waste  
It's all a bit to fake  
Someone killer lines

It's failing something I could do

Tower spits I have the fuse  
If I want I can't refuse  
It's useless now

Come on and feel our love  
Come on and feel our love  
Come on and feel our love  
Feel Our Love  
Come on and feel our love  
Come on and feel our love  
Come on and feel our love  
Feel Our Love

Feel Our Love

Feel Our Love  
If love ain't enough  
For I love what I sung

To reflect to the one

What I've sung  
I split in half  
Now it's always  
However you and I  
Love is always  
on Fire

Feel our love  
Feel our love  
Come on and feel our love  
Come on and feel our love  
Come on and feel our love  
feel our love  
Come on and feel our love  
Come on and feel our love  
Come on and feel our love  
Just Feel our love  
Come on and feel our love  
Come on and feel our love  
Come on and feel our love  
Just Feel our love  
Come on and feel our love  
Come on and feel our love  
Come on and feel our love  
Just Feel our love
