Lover lover let's pretend
Were born as innocents
Cast into the world
With apple eyes
To wish wish
dangerous
My dear delirious
To try and leave
The rest of us behind
Shot full of diamonds
And a million years
The disappointed disappear
As if they were never here
Kiss kiss all of this
The kiss that we had missed
And understand
What can't be understood
Sear those thoughts of me
Alone and unhappy
I never liked me
Anyway
If by chance
Or circumstance
We should fall
Don't be too sad
Shot full of diamonds
And a million years
The disappointed disappear
Like they were never here
In a dream
We are connected
Siamese twins
At the wrist
That's when I knew
We had been forsaken
Expelled from paradise
I can't believe them
When they say it's all right
Words can't define what I feel inside
Who needs them?
Caught with this virus on my mind
I give into my disease, the disease of my needs
To my disease, of my needs
She really loves to break
Her dad says it's ok
She really loves to break
And give it all away
Her mom says she's a flake
What more can she be
She really needs to break
And give us all away
She gave it all away
She gave it all away
She gave it all away
To be in love in usa
