(feat. Louise Decordova)

Life is so eventful
Life is so eventful
How could we complain

There is nothing to explain
I feel the same
And if your looking to further your mind
Don't try to reassemble the past too quickly
And don't forget the time that it takes to make a
change
And if your looking to further your mind

Life is so eventful, life is so eventful
How could we complain

There is nothing left to say, just face the day
Andif your looking to further your mind
Don't think it's not a problem for some to get ??
And try to find the time the time that it takes
communicate
And if your looking to further your mind

Life is so eventful, life is so eventful
How could we complain
