(feat. Rudy Lee)

Yes we live and we learn
Yes we live and we learn
That's why I say

In this lesson called life
Give what you can before you say goodbye
In this lesson called life
You see what you must before you have to fly
In this lesson called life
To conquer fear we've all got to try
In this lesson called life
Learn how to live and not how to die

Everyone we meet it is for a reason
And the lessons we've learned we exchange

We all have our own destinies but the decisions
We make in life can cause them to change

Yes everyone who lives lives for a purpose
Some live their whole lives never knowing what this is

Listen to the voice of the creator within you
Try to always do this as you live

In this lesson called life
Give what you can before you say goodbye
In this lesson called life
You see what you must before you have to fly
In this lesson called life
To conquer fear we've all got to try
In this lesson called life
Learn how to live and not how to die
Experience is learning
So we're bound to make mistakes, yes
We've all got to learn our lessons
And we can't wait until it's too late

Righteousness exalts a nation
And sin it is a reproach

Let's make the creator be our teacher
Let Him be our trainer and our coach

In this lesson called life
Give what you can before you say goodbye
In this lesson called life
You see what you must before you have to fly
In this lesson called life
To conquer fear we've all got to try
In this lesson called life
Learn how to live and not how to die

Yes we live and we learn
Oh yes we live and we learn
Yes we live and we learn
Oh yes we live and we learn

You've got to learn what you must
And share what you can in this lesson
You're got to learn what you must
And share what you can in the school of life
Yes we live and we learn...
