Craig Smith

Blessed are You, Father, sender of the rains

Ruler of the earth and all that it contains

Maker of the seasons who's declarations stand

The heavens hear Your voice obeying each command

Chorus

You are the Lord of all the earth

The God who reigns on high

You are the Lord of all the earth

The God we glorify

Blessed are You, Jesus, Holy Son of God

Captain of salvation, glory of the Lord

Everlasting ruler, bread of lasting life

Jesus the Redeemer, Holy Prince of Life

Chorus

Blessed Holy Spirit, breath of Holy God

Spirit of Jesus, comforter of God

Spirit of wisdom, spirit of might

Revealing, understanding of He who sends the light

Worship the Lord

There are five distinctively divine attributes, which
each person of the

Godhead possesses. These are eternity,
omnipresence, omniscience,

Omnipotence, and immutability. We worship the triune
God, the Creator

And Lord of all things. May our prayers be that He keep
us truly

Devoted to pleasing Him. To get our eyes off of what is
temporal and of

No lasting value, and keep our eyes only on those
things of eternal

Worth.--Craig Smith

"For since the creation of the world His invisible
attributes, His

Eternal power and divine nature, have been clearly
seen, being

Understood through what has been made, so that they
are without excuse.

Romans 1:20

"The fool hath said in his heart, 'There is no God.'"

Psalms 14:1

On a clear night with no city lights, we are able to see
maybe 6,000
Stars and planets with the naked eye. This is only a
small percentage
Of the 10 billion stars and planets in our galaxy alone.
The deepest
Spot in the ocean is over a mile deeper than the tallest
mountain (Mt.
Everest) is high. Thirteen thousand, three hundred
kinds of fish live in
The sea. Scientists have described and named about a
million kinds of
Animals. Of these, more than 800,00 are insects. They
discover from
7,000 to 10,000 new kinds of insects every year. The
human heart beats
100,000 times a day and a 70 year old man has
pumped 46 million gallons
Of blood in his lifetime through arteries and vessels
that would
Stretch 60,000 miles. The grayish-pink, jelly like ball in
our heads
That we call a brain, contains 10 to 100 billion neurons
linked together
In amazing complexity to smoothly control our five
senses. As we look
At the world around us, how can we do anything but
bow to the Lord of
All the earth.--Bill Stuckey
