I love your face  
I love the way you smile at me  
An open door that lets the sunshine in  
It lights my world, my days

I love your face  
I love the look that's in your eyes  
You see right through the deepest part of me  
Right down into the heart of me  
I love your face

Don't you ever change, you're just right for me  
I love all of you  
And especially I love your face  
I love the message there for me

The greatest love story I ever heard  
Without a sound, without a word  
I love your face  
I love your face  
I love your face
