I wanted to get away
But you came I know you wanna
Try to get away
But you were on my tail the whole way home
So I was left alone
But you never came
So I thought I could get away
But I was wrong
I know I'm never right

One day I thought I could
But I never before
Tried to get away the time was on my mind
Try to find a way to see
The heart is designed from nothing I've been till now.
I want you

Tried to get away the time was on my mind
Try to find a way to see
The heart is designed from nothing I've been till now.
I'm up to no good
Ooh, I'm trying my hardest
Today, pretty soon it'll be tomorrow
But now with that day, hey
Well I tried to get the ribosome*
And knowing that I couldn't ever get away
And you know, I never knew that you
Yeah yeah yeah, every day I'm on to you
But you won't try to think that I

Today, pretty soon it'll be tomorrow
But now it's that day
Hey hey hey
