Here I come
Through the west wing of your house
Slay the butler by the door
Plan my attack for weeks and weeks

Some mad thinking going on here
Grab your smile and from the bed
As we head down to the town

Here we come
Through the city streets at night
Causing mayhem as we go
Never letting go of hands

Your eyes burnt and nothing stopped
Steal a car and drive away
Your eyes never even burn so

Wanna stay with you
Wanna stay with you
Wanna stay with you
